WHILE we have an adequate supply of plants of varieties listed, occasionally there is an unexpected demand for some particular one. Unless otherwise instructed we will substitute any variety we cannot supply with one of equal or greater value. If you instruct us not to substitute, your order will be shipped when we can supply the variety in question. This usually means a delay of two or three weeks.

WE are constantly adding to our list new varieties of our own and from the leading growers of the country. We offer these varieties a full season ahead of our competitors because we buy them as soon as they are released, not waiting for the price to be reduced. If you want a particular variety not listed write us about it; we can usually supply it promptly.

Write us about your carnation problems. Our growers are thoroughly experienced and will be glad to answer your questions and give suggestions.
